- » Fully assembled gate including 2 x gate stile caps
- » Aluminium reinforcing within stiles for hinge and latch placement
- » Durable white UV stabilised PVC with titanium dioxide additives
- » Seamless shiplap grooves using tongue and groove design element and construction
- » Elegant 38 x 38mm vertical vertical slats on panel tops offering breezes and private outlook

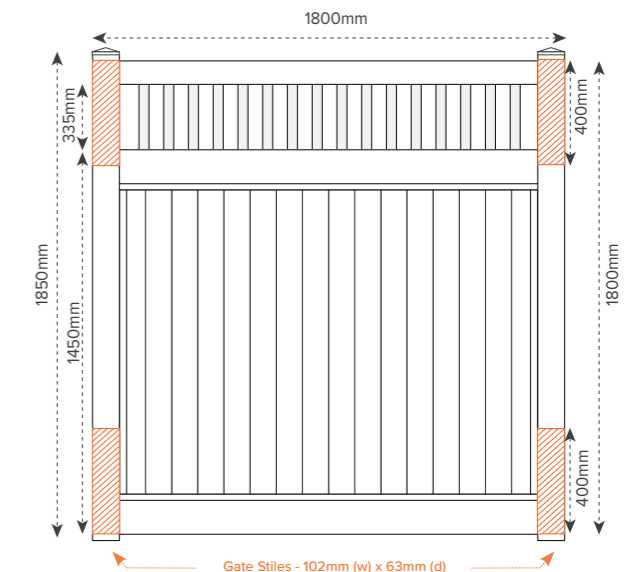

Fully Assembled Gate

Our fully assembled gate comes ready to use, with no assembly required & includes 400mm of aluminium re-inforcing within gate stiles for hinge and latch placement

East Hampton Gate - 1800 x 1800mm

CODE: PVC260 | WEIGHT: 33.2kg

- » Fully assembled gate including 2 x gate stile caps
- » Aluminium reinforcing within stiles for hinge and latch placement
- » Durable white UV stabilised PVC with titanium dioxide additives
- » Seamless shiplap grooves using tongue and groove design element and construction
- » Elegant 38 x 38mm vertical vertical slats on panel tops offering breezes and private outlook

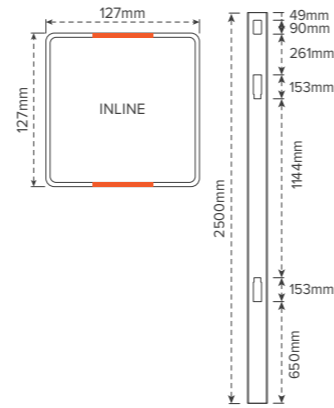

Inline Post - East Hampton Range

CODE: PVC205

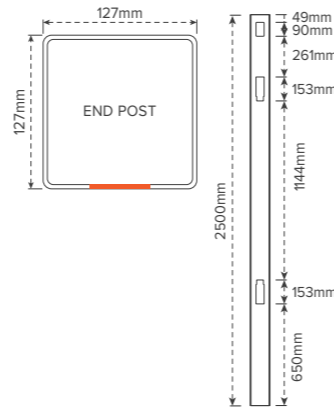

- » Inline post for straight fences
- » 2500mm Height x 127mm Width x 127mm Depth; Wall Thickness: 3.8mm
- » White UV Stabilised PVC with titanium dioxide additives for enhanced protection
- » Slotted holes on both sides for easy rail insertion
- » Top cap sold separately

End Post - East Hampton Range

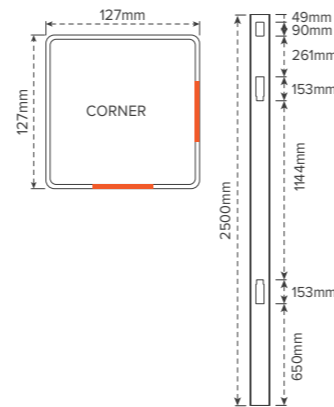

CODE: PVC210

- » End post for start or end of runs
- » Suitable for use between stepping panels
- » 2500mm Height x 127mm Width x 127mm Depth; Wall Thickness: 3.8mm
- » White UV Stabilised PVC with titanium dioxide additives for enhanced protection
- » Slotted holes on one side for easy rail insertion
- » Top cap sold separately

Corner Post - East Hampton Range

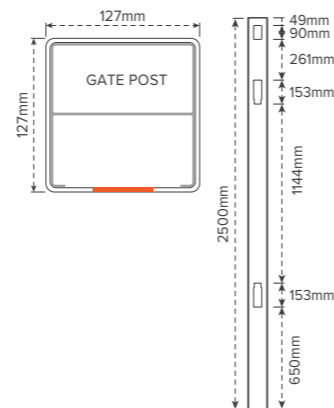

- » Corner post for 90° corner
- » 2500mm Height x 127mm Width x 127mm Depth; Wall Thickness: 3.8mm
- » White UV Stabilised PVC with titanium dioxide additives for enhanced protection
- » Slotted holes on both sides for easy rail insertion
- » Top cap sold separately

Gate Post - East Hampton Range

CODE: PVC270

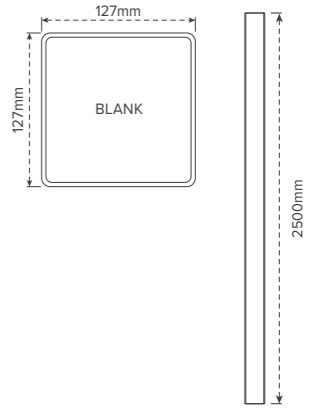

- » Includes internal 1.5mm thick aluminium insert entire length of post. Provides post rigidity and sturdy substrate for fixing of hinges & latches
- » 2500mm Height x 127mm Width x 127mm Depth; Wall Thickness: 3.8mm
- » White UV Stabilised PVC with titanium dioxide additives for enhanced protection
- » Slotted holes on one side for easy rail insertion
- » Top cap sold separately

Blank Post - East Hampton Range

CODE: PVC220

- » Blank post for use with panel brackets
- » 2500mm Height x 127mm Width x 127mm Depth; Wall Thickness: 3.8mm
- » White UV Stabilised PVC with titanium dioxide additives for enhanced protection
- » Blank posts can be used in conjunction with rail brackets when panel to panel rails do not line up
- » Top cap sold separately

Post Accessories & Rail Brackets

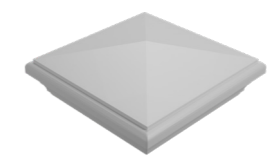

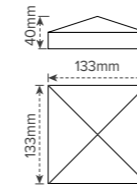

Slimline Post Cap

Suits 127 x 127mm Post

CODE: PVC900

- » Low Profile post caps
- » Suits 127 x 127mm Posts
- » Press on external fit cap
- » White UV Stabilised PVC with titanium dioxide additives for enhanced protection

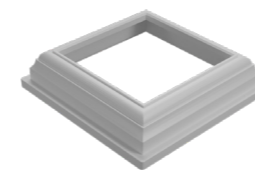

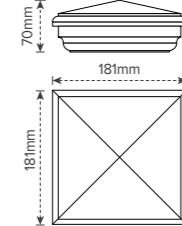

New England Post Cap

Suits 127 x 127mm Post

CODE: PVC910

- » Decorative Hamptons style post cap
- » Suits 127 x 127mm Posts
- » Press on external fit cap
- » White UV Stabilised PVC with titanium dioxide additives for enhanced protection

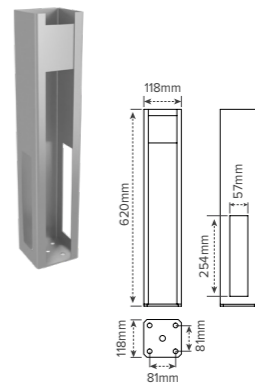

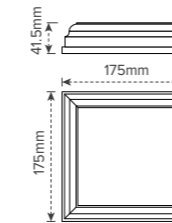

Decorative Cover Ring

Suits 127 x 127mm Post

CODE: PVC940

- » Decorative Hamptons style post cover ring
- » Suits 127 x 127mm Posts
- » Place on posts prior to installing panel kits
- » White UV Stabilised PVC with titanium dioxide additives for enhanced protection

Concealed Base Plate

Suits 127 x 127mm Post

CODE: PVC950

- » Internal fitting base plate suits End, Inline & Corner posts. Not suitable for use with Gate Posts
- » 6mm thick base plate with 2mm thick vertical walls
- » Cold-galvanized steel providing strong corrosion resistance
- » Not recommended for use in high wind load areas

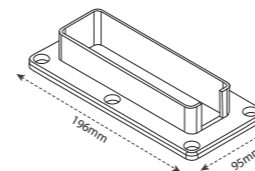

PVC Rail Bracket

Suits 51 x 152mm Rail

CODE: PVC920

- » Suitable for use when affixing rails to walls or in combo with PVC end posts when stepping of panels is required.
- » White UV Stabilised PVC with titanium dioxide additives for enhanced protection
- » Fixings for screwing brackets to post or wall not supplied

PVC Rail Bracket

Suits 51 x 89mm Rail

CODE: PVC930

- » Suitable for use when affixing rails to walls or in combo with PVC end posts when stepping of panels is required.
- » White UV Stabilised PVC with titanium dioxide additives for enhanced protection
- » Fixings for screwing brackets to post or wall not supplied
